PROJECTS

JanSahay – AI-Driven Scheme Matching Platform | *React, TypeScript, Python, MySQL*

2026

GitHub | Live

- Developing an AI-driven platform to help marginalized entrepreneurs discover relevant government schemes based on their requirements.
- Designed three core modules: Scheme Recommender, EMI Calculator, and Geo-Partner Locator for connecting users with eligible channel partners.
- Working toward backend and AI integration to process user requirements and provide relevant scheme recommendations.

College Vacation (TripMate) | *Figma, UI/UX Design*

2026

- Designed a travel-planning application concept in Figma, covering user flows, wireframes, and high-fidelity interface screens.

COURSES & CERTIFICATIONS

Online Courses: Python, Full Stack Web Development, FastAPI, LangChain/GenAI, UI/UX Design
